July 8, 1954

Dr. Samuel R. Gerber, Coroner  
Coroner's Office and Laboratory  
2121 Adelbert Road  
Cleveland 6, Ohio

Dear Dr. Gerber:

Here are the data obtained on the complete blood grouping tests performed on the blood specimen recently submitted. This is the blood specimen from Mrs. Marilyn Sheppard which Miss Cowan handed me personally on July 7 at 8:40 A.M.

	Anti- <u>A</u>	<u>B</u>	<u>C</u>	<u>D</u>	<u>E</u>	<u>c</u>	<u>M</u>	<u>N</u>	<u>S</u>	<u>K</u>	<u>F</u>
Mrs. Marilyn Sheppard	Neg.	Neg.	Neg.	Neg.	Neg.	Pos.	Pos.	Neg.	Pos.	Neg.	Pos.(wk.)

Therefore Mrs. Sheppard is a type O Rh negative, type MS, Kell negative and Duffy positive. These reactions were entirely satisfactory although somewhat slow in a few cases. The M and S reactions were excellent although the Duffy(F) was weak. Each of these reactions was confirmed by the inclusion of known positive control bloods. Furthermore, the International type O finding was corroborated by the demonstration of A and B antibodies in the Sheppard serum.

Respectfully submitted,

  
Roger W. Marsters, Ph.D.  
Director, Maternity Rh Laboratory
